Dr. Boris E. Bravo-Ureta, the Director of the LID Program, has been a Professor of Agricultural and Resource Economics for the past 28 years. He served as Executive Director of the Office of International Affairs from July 1998 to August 2008.

Dr. Bravo-Ureta has conducted extensive research on economic development and in recent years has analyzed the economic impact of several large development projects. Over the past 20 years, he has coordinated and conducted training programs on a wide range of topics throughout Latin America and Africa. He has also been a consultant to governments and international organizations on various development projects.

Ms. Diane Wright Hirsch, Food Safety Educator, UConn

STAFF

Ms. Claire Bazzano, Administrative Assistant, Ag. & Resource Economics, UConn
Ms. Karen Nye, Administrative Assistant, Ag. & Resource Economics, UConn
Ms. Mary Thuo, Graduate Student, School of Education, and LID Program Assistant, UConn
The Learning for International Development (LID) Program aims to provide state-of-the-art short-term training to officials and professionals from governmental and non-governmental organizations involving a variety of subjects related to international development. The training is designed to enhance the knowledge and abilities of participants in the formulation, implementation, and evaluation of development projects with the intention of promoting the effectiveness of international development assistance.

International development expertise and successful project implementation are critical elements as we attempt to achieve the Millennium Development Goals launched by the United Nations and the broader international community. These elements are also crucial to advancing the harmonization agenda set forth in the Paris Declaration as updated recently in the Accra Agenda for Action.

The LID Program provides training opportunities in two major formats:

1. Two Modules of a Regular Course entitled Appraisal, Monitoring, and Impact Evaluation of Development Projects; and

2. Custom-Designed Courses in areas related to various aspects of the project cycle, human capital, natural resource management, health and nutrition, and the economics and safety of the food system.

Instruction in all courses relies on lectures, group discussions, team work, computer laboratories, short videos, and field visits, as appropriate. Participants will be provided a variety of articles on a CD and in hard copy.

Appraisal, Monitoring, and Impact Evaluation of Development Projects: Modules I and II.

This course is divided into two modules that can be taken in sequence or separately. The focus is to take participants through a framework designed to handle different types of projects, as well as a wide range of issues from financial to economic analysis and impact evaluation. By the end of the course, participants will have significantly enhanced their ability to conduct various analytical tasks as well as to provide leadership to teams responsible for project analysis.

**MODULE I: May 18-29, 2009**

- The Project Cycle
- Stakeholder Analysis
- Logical Framework
- Financial Analysis
- Risk Analysis
- Case Studies

**MODULE II: June 1-12, 2009**

- Economic Analysis
- Environmental Analysis
- Gender Analysis
- Intro to Geographic Info. Systems in Dev. Projects
- Economic Impact Evaluation
- Case Studies

**TUITION**

Module I or II: $3,950
Module I and II: $7,650

Tuition includes transport from/to Bradley Airport, materials, field trips, sightseeing, and daily coffee breaks. It does **not** include meals or lodging. However, upon request, you may receive a package including meals and lodging. For details and the REGISTRATION FORM, please visit our website at: [www.lid.uconn.edu](http://www.lid.uconn.edu)

Our custom-designed courses are tailored to meet specific training needs and are developed in close collaboration with the client. Recent courses include:

- Skills for Negotiating Development Assistance Projects
- Food Safety
- Agribusiness Management

In addition, LID has access to a wide array of professional expertise in various subjects, among them:

- Geographic Information Systems in the Management & Oversight of Development Projects
- Agricultural Extension and Rural Development
- Health and Nutrition
- Policy Analysis of the Food System
- Management of Marine Protected Areas and Coastal Resources
- Leadership and Resource Management

Tuition for all custom-designed courses is negotiated with clients on a case-by-case basis.
